

SPARK

INDUSTRY DEEP DIVE: NURSING

Broome-Tioga BOCES

- The New Visions Health Academy is an exciting and challenging program for high school seniors interested in a wide variety of health careers, including both traditional and alternative/complementary areas of medicine. They integrate real-world internships into an academic course introducing students to the main issues involving today's health care industry. Learn more: <https://www.btboces.org/NewVisionsHealth.aspx>
- Pathways in Technology Early College High School (P-TECH) enables students to earn an associate degree while simultaneously working toward their high school regents diploma. Students entering grade nine are selected for this six-year program based on an application and recommendations. Students work in a project-based, high-tech learning environment created to simulate real-world problem solving and creativity. After-school and summer support are important components of the program. P-TECH prepares students to earn an associate degree in one of three technical areas: computer technology, engineering technology, or health studies. Learn more: <https://www.btboces.org/PTECH.aspx>

SUNY Broome Nursing

- SUNY Broome's Nursing Program prepares students for entry into the modern healthcare workforce. Graduates are eligible to take the National Council Licensure Examination (NCLEX). The Nursing Program has required educational components in all of the following areas: classroom, clinical facilities and the nursing skills lab. Each student must meet the mathematics proficiency requirements at selected intervals during the program. Learn more: <http://www1.sunybroome.edu/programs/nursing/>

Binghamton University Nursing

- Students educated in our undergraduate and graduate programs will learn to practice nursing from an evidence base. Consistent with our tradition as a public institution, the college provides educational access and support to culturally and economically diverse students in a culture of diversity, respect and success, with coursework and clinical experiences designed to promote socially just and competent care of all persons.
